

■ MS65P

➔ Insulated ratchet spanner 1/2" square drive with mechanical locking

▶ STANDARD(S)

EN 60900 / IEC 60900 / ISO 1174-1 / ISO 3315

▶ USE

To facilitate the tightening of connectors on overhead or underground service lines and many other applications.

▶ SPECIFICATIONS

Compliance : Each product is interchangeable and bears the interchangeability logo.

Practical : Socket released by pressing the push button

Robust : The bearing located in the drive mechanism is specially designed to resist a torque of 500 Nm i.e. roughly the equivalent of 50 kg applied on a lever distance of 1 metre.

▶ ADVANTAGES

Specific model : the sockets and extensions remain interdependent to the spanner during use.

Reference	Description	Square drive	Length (mm)	Weight (g)
MS65P	Insulated ratchet spanner 1/2" square drive with mechanical locking	1/2"	268	600
